Web Design & Development

Your **web design** will vary in style and type depending on your particular marketing requirements. We believe that each web design and development is unique and should be treated as such from concept to product.

Our **web design packages** are provided as a guide for our various website development services, client-tailored website solutions are catered for to suit your specific requirement. Optional add-ons can be added to each web design package. These include, competitor website research, advanced SEO and online marketing, creative and technical writing, supply of audio, video and photography, CSS imagery and Flash galleries, Flash banners and animation as well as content management systems (CMS) and shopping carts for your online shop.

Our **website solutions** support initial as well as ongoing management (Web Mastering) of your online assets. We offer [domain name registration](#) and a custom [website hosting plan](#) to accompany your website development. We also offer additional search engine optimization (SEO) strategies as part of our website development and online marketing services.

We have a database of over 8500 predesigned web templates for you to choose from. Prices vary from as low as \$50.- to \$250.- and can be simply filled with your own text, graphics and photos by someone with basic web design knowledge. All hosting packages come with a in build website design system and we supply all necessary tools to manage your own website. There are over 30 software packages included to set up things like e-commerce online shops, forums, calendar, blogs, photo galleries and much more.
